# Getting Started

---

## System Requirements

- DVD writer drives.
- 256M or more memory.
- 5 GB or more free disk space.
- DirectX8.0 or higher.

## Creating your own DVD movie:

1.Importing AVI video files:

Hit  button to add AVI video files from your computer, Hit  or  to change the order of source files, the order of source file is the playing order of them in final DVD.

2.Settings:

1) Hit  PAL (Europe, Africa, Australia, South America, China) or  NTSC (US, Canada, Central America, Japan) to select TV system, NTSC TV system is mainly supported in USA, Canada, South America & the Caribbean. PAL format is supported in most other countries..

Aspect ratio:  to select Aspect ratio, 16:9 os for Wide screen TV and 4:3 is for standard TV.

3) Hit  to select or create temporary folder, temporary folder is for storing temporary files before burning DVD, you need at least 9G free disk space to create a 4.5G video DVD, this folder is set as C:\ZCAVItoDVD\ by default.

DVD Recorders:  to select DVD recorder to burn DVD movie.

Burn to DVD disc if you do not check this option, all video content will not be burned into DVD disc but stored in temporary folder, you may burn it later <http://www.videoxdvd.com/>.

Delete tmp file select this to delete temporary files after burning.

Shutdown computer when finished shutdown computer when mission accomplished.

3. Starting:

Hit  to start creating your favorite DVD movie if everything is okay.

If you set "Burn to DVD disc", please insert a blank DVD R/RW into your DVD writer, ZC AVI to DVD Creator will burn DVD movie to your disc.

If you do not set "Burn to DVD disc", you can play your DVD in hard disk with PowerDVD or other DVD player software or burn it later.

(PowerDVD is a powerful DVD player software, click [here](#) to download it)

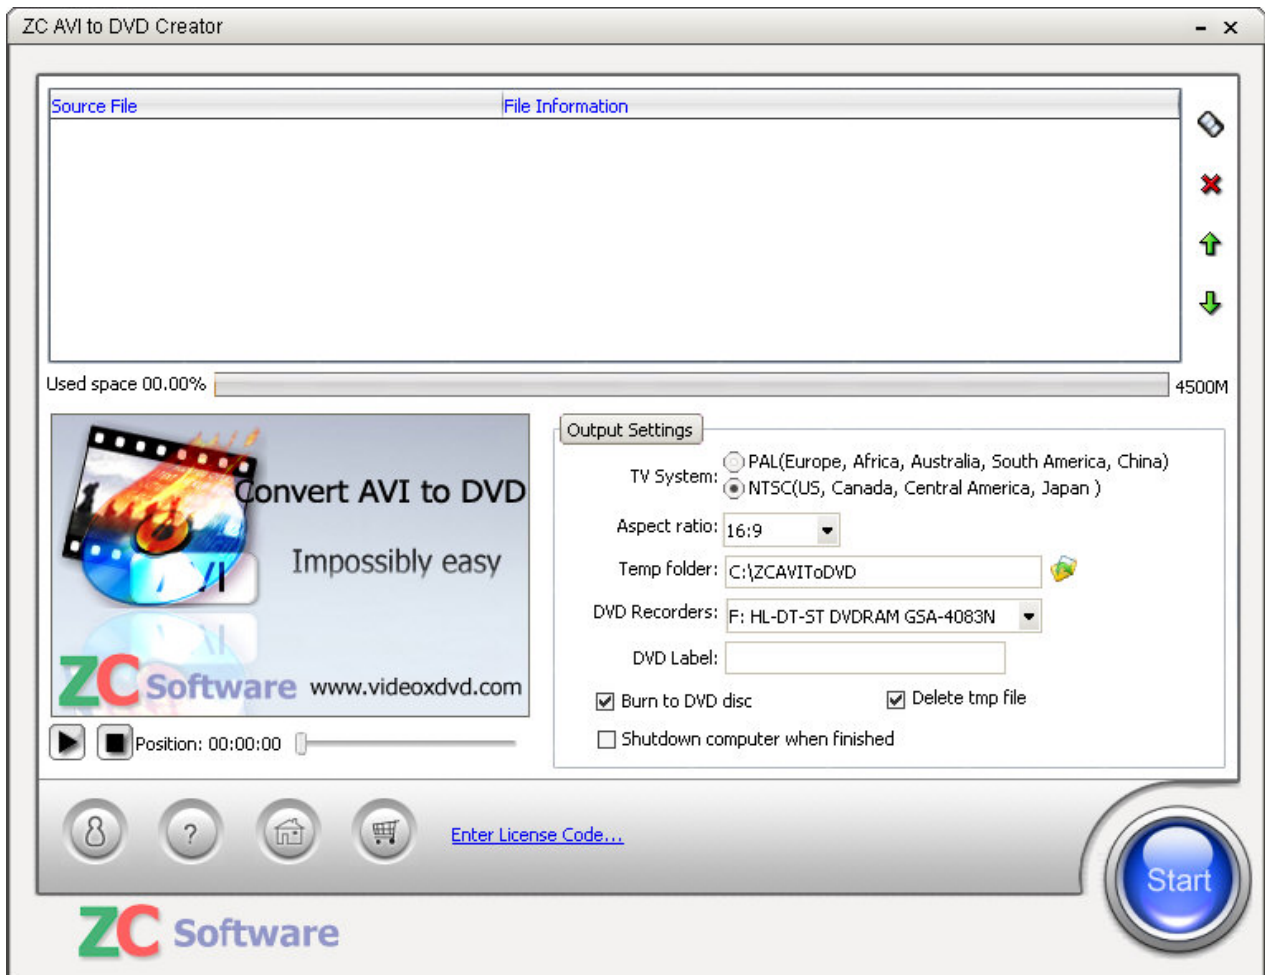

How to burn DVD image from hard disk into a blank DVD R/RW?please check at <http://www.videoxdvd.com?>
